WELCOME TO ARTISTIC TEAK

Welcome to Artistic Teak, where nature and history meet in the form of beautiful furniture born from Mother Earth. We are one of the largest teak furniture companies in the United States and are dedicated to designing and producing the finest handmade furniture you will find.

Formerly known as Artistic Teak Traders, we have evolved into Artistic Teak. Our beginning revolved primarily around teak root furniture. As we have grown and developed, our ability to bring new products to life has allowed our furniture line to expand and find new and emerging markets.

Our 35,000 square foot warehouse is located in Camp Hill, Alabama, near Auburn University, where we design and ship our products. We work with some of the world's finest suppliers and our working relationships are strong and productive.

Each of our teak root, reclaimed teak, stone and carved products are handmade and are highly crafted by some of the world's most accomplished artisans. Because these are handmade, you will never see two alike. You can be assured your purchase is truly one-of-a-kind.

Artistic Teak was founded by artist and designer Owen Walton, originally as Artistic Teak Traders, Inc., a wholesale company. His vision for teak root furniture and its possibilities has grown into what we are today. As markets change, so will the challenge to meet those opportunities with new products. As we grow and reach new capabilities, we will endeavor to bring new ideas and new products to the marketplace.

Remember, when you buy a product from us you are buying a product that will last a lifetime.

A handwritten signature in black ink, appearing to read "Owen Walton".

Teak Wood

PRODUCT INFORMATION PAGE

Teak is considered the most beautiful and best wood known for indoor-outdoor furniture, boats and yachts. Teak is incredibly durable, strong and water resistant. Teak has a high oil content, giving it the highest decay resistance among all natural woods and has a great resistance to termites and other pests. Teak is one of the heaviest and most dense woods and is less likely to crack, warp and twist than other woods.

It is important to understand that the beauty of solid wood may have some properties that sometimes can be misunderstood. Solid wood will adjust and move to the time of the year and the moisture content of the air. In other words, solid wood will breathe and adjust to your home conditions. A home that is dry may cause your wood to move and crack more than a home with higher humidity.

Most of our teak root items are made from stumps, roots and the limbs of harvested teak trees, some being 200, 300, even 400 years old. The most beautiful wood grain and figures are found in the roots and stumps. All of our wood will have checks, cracks, holes, knots, different coloration and natural imperfections. These imperfections and natural weathered textures are what makes our items so beautiful and truly one-of-a-kind masterpieces.

WARRANTY

Our warranty is simple. We want you to be pleased with our furniture. Although our furniture is extremely durable, nothing is indestructible. Therefore, we will warranty to the original purchaser for one year from the date of purchase and will at our discretion, fix and repair or replace any furniture that is found to be defective in materials or workmanship.

RETURN POLICY

We want you to be completely satisfied with your purchase. If you should encounter a problem or need assistance with your item, please contact us and let us know what you need. You are the reason we are in business and our goal will always be to see that you are happy and satisfied with our products.

Care Instructions for Your Product

INDOOR TEAK WOOD CARE:

It is important to understand that the beauty of solid wood may have some properties that may not be understood. Solid wood will adjust and move to the time of the year and the moisture content in the air. In other words, solid wood will breathe and adjust to your home conditions, and checks and cracks may open and close. You can keep your teak furniture beautiful year after year with the many different wood care products available on the market.

OUTDOOR TEAK WOOD CARE:

The main difference in indoor and outdoor care of your teak furniture is the effect of the UV rays in the sunlight. If in direct sunlight, the UV rays will fade the finish and surface of the wood. Like people that own teak boats, you will have to do yearly maintenance. This consists of cleaning, lightly sanding and reapplying the finish of your choice and the beautiful color of the wood will reappear. It is recommended that you keep your furniture covered when not in use, or under a covered area to avoid the effects from UV rays.

We are thankful that you chose our teak products.

If we have not answered a question you may have, please feel free contact us: **sales@artisticteak.com** or **phone: 256-896-1111**

TEAK. *The Most Beautiful and Desirable Wood In The World.*

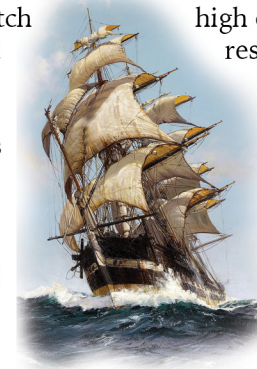

A WORLD OF TEAK WOOD

Teak wood is indigenous to just four countries in the world including Burma, Laos, Thailand and India. Due to excesses in logging and poor forest management, teak abundance suffered greatly in the past century. However, thanks to better planning and government controls, teak wood now flourishes in well-maintained plantations throughout Southeastern Asian countries including Indonesia where some of the highest quality teak in the world is grown.

ORIGINS OF TEAK IN TRADE

Teak was first brought to Indonesia by Buddhist Monks in the 16th century from Burma. The Dutch in their first efforts to expand their trade routes from Asia to Europe saw the need to build more and sturdier ships for the longer journeys. Teak became an indispensable product and helped solidify the success of the Dutch East Indies spice routes.

WHY INDONESIAN TEAK?

Indonesian teak wood is highly prized for furniture, and also in the yachting industry because of its unmistakable

quality. Growing conditions for teak are very favorable on the island of Java where sub-tropical conditions, fertile soils, generous aeration, free draining, plus up to 146" of rain per year make it an ideal location. Thanks to the Indonesian government's vision, the controlled teak plantations will assure a steady supply of premium quality teak for the future.

TEAK'S DESIRABLE QUALITIES MAKE IT THE PERFECT WOOD FOR FURNITURE

Teak is a valuable tropical hardwood because of its properties. Teak is very dense in structure and has naturally high oil content. This makes teak resistant to insects, rot, fungi, and mildew. Teak furniture will last for generations because of its durability in the elements. It can take anywhere from 35-50 years for a teak tree to fully mature. Plantation managers have proven that tree maturity yields more stable and desirable wood quality. Teak is durable, versatile and desirable as a furniture wood.

MORE OF OUR STORY CONTINUES...

We Create Our High Quality Teak Furniture with Skilled Indonesian Craftsmen

IT ALL BEGINS WITH OUR INDONESIAN PARTNERS

Artistic Teak's beautiful teak furniture begins its long journey with our Indonesian counterparts. Each season after trees are harvested, farmers are allowed to dig up the discarded left behind stumps. Since the government controls all of the teak tree from a few inches above the ground, all that remains is the stump, roots and limbs. This is the prized part of the teak tree that we use in our furniture. Care is used to dig up these large stumps that can be up to 400 years old. Once removed, a team of oxen is then used to pull the stumps from the plantation field. They are then carried to our facility where they are

inspected and cleaned. Once we know the stump has properly dried we then decide what furniture piece we will create. Now the magic begins from our Indonesian artisans.

After we carefully choose the furniture piece to do, we guide the workers through the design stage and check the progress all throughout the working and finishing stages. It is a marvel to witness these truly gifted artisans apply their skills and create beautiful masterpieces time after time. It is a blessing to help them enjoy meaningful work creating our special line of products.

We are extremely grateful to all our Indonesian partners and their families as we believe their contributions make a world of difference for all of our teak furniture products.

BEAUTIFUL WOOD MAKES BEAUTIFUL FURNITURE

Selecting the right teak root for a furniture piece is important. Whether it's a one-piece slab, or a root base for a bar or side table, care is taken to maximize the beauty of the final piece. We embellish teak root by allowing the most attractive parts to remain the focal point and to bring a beautiful high finish to every piece we create.

NOT ALL TEAK IS THE SAME

Using teak root (from the stump) is just one type of teak wood used in building furniture.

Reclaimed Teak is another form of teak wood that can be used in furniture making. Reclaimed Teak is teak wood that has been recovered from old buildings or structures that have been demolished. These structures can be up to 400 years old when torn down making the reclaimed wood from them very dry and stable.

The dried, stable nature of reclaimed teak is an advantage due to its durability and its beautiful honey brown appearance.

We are certain that whatever teak product we make and no matter which one you like, you can be assured it will reflect the care and high level of production standards that make all our teak furniture so beautiful.

What Is Reclaimed Teak?

Reclaimed teak is teak wood that has been harvested from old, unused structures. This matured teak can be 200-300 years old. It's an extremely strong and resilient wood. With exceptional stability, teak is able to withstand heavy use and last for centuries. Reclaimed Teak is highly resistant to pests, rot, fungi, and mildew, making it ideal for indoor or outdoor use. Another characteristic of Reclaimed Teak is its attractive honey brown color.

Montana Dining Collection

Solid Reclaimed Teak Dining Table seats up to 8 guests with a variety of seating options

Shown with Optional Benches

Beautiful, handcrafted, solid reclaimed teak dining table with striking bell shaped trestle-style base. Wirebrush finish for a farmhouse rustic look. Available with our new custom back or slat back chairs in arm & side chair options and side bench.

WHAT IS RECLAIMED TEAK WOOD?

Reclaimed teak is teak wood that has been harvested from old, unused structures. This matured teak can be 200-300 years old. It's an extremely strong and resilient wood. With exceptional stability, teak is able to withstand heavy use and last for centuries. Reclaimed Teak is highly resistant to pests, rot, fungi, and mildew, making it ideal for indoor or outdoor use. Another characteristic of Reclaimed Teak is its attractive honey brown color.

NEW FOR
2024!

PREMIUM TEAK WOOD **BEVERAGE BAR**

WITH TWO HIDDEN WEAPON COMPARTMENTS

This solid teak wood bar is the most complete self contained bar ever made and has two easily accessible hidden, but in-plain-sight weapon compartments.

The upper cabinet has two lockable glass doors, a glass shelf, two hanging glass racks, mirrored back wall, adjustable light, electrical outlet with AC power and device charging ports, engineered stone countertop and two hidden weapon compartments with proprietary locking system.

The bottom cabinet has two utility drawers, two lockable cabinet doors, right-side storage compartment with removable shelf that when removed makes room for a mini fridge. Left side compartment has four specially designed wine bottle drawers.

The two hidden compartments can hold rifles, shotguns, pistols and ammunition.

Shown in
Natural
Teak color.

**Everything You Need In A Bar With
Quick Home Protection When You Need It!**

COMING SOON!

PREMIUM TEAK WOOD BOOKCASE WITH TWO HIDDEN WEAPON COMPARTMENTS

How do you make a bookcase more appealing? We felt giving it an added benefit was the answer. That's what we did. We put home protection in plain sight and within arms reach. No one will suspect this stealthy feature.

The upper unit has hidden weapon compartments on both sides. Quick-access will allow you to retrieve weapons in a hurry. Three adjustable shelves can be moved up or down to provide flexible spacing options.

The bottom cabinet features twin locking doors and an interior single shelf that can be removed to make more room.

Always Ready.

Hidden compartments on both sides of this bookcase allow you to place pistols, shotguns, rifles and ammo for quick and easy access.

The Reach & Ready® Series of home protection furniture will provide you peace of mind.

Available in Natural Teak
or Grey color

BOOKCASE AND ADDED SECURITY ALL IN ONE

OUR REACH & READY® BOOKCASE DELIVERS STEALTHY PROTECTION IN PLAIN SIGHT

HIDDEN WEAPON QUICK ACCESS

We've designed a new bookcase and added two hidden weapon compartments. Both compartments can be quickly opened.

Compartments are on both sides of the bookcase so you can enter from either side. There is ample room for a rifle, shotgun or several pistols and ammo.

Don't be without this protection at home.

Patent Pending

ADJUSTABLE SHELVING FOR FLEXIBILITY

We have designed this bookcase with true flexibility. All the top shelves can be adjusted up or down or simply removed. This allows you to space your shelves according to your individual needs.

CABINET STORAGE WITH SHELF

The bottom cabinet features double doors for securing contents away. The shelf is removable to provide greater flexibility of interior space.

Doors lock for added security.

- Beautiful Teak wood
- Choice of Natural or Grey color
- Upper and lower sections can be easily separated
- Traditional style looks great in most any setting
